

## **Colored Forbo Cork Bulletin Board Care & Maintenance**

Bulletin Board is ready for immediate use. Adhesive residue should always be removed as quickly as possible with a clean damp cloth. Dried adhesive residue should be cleaned with a clean cloth and mineral spirits.

Regular dusting, or if necessary, wiping with a damp cloth guarantees a long useful Bulletin Board life.

Note: Bulletin Board does not normally need a special maintenance product.

Clean Bulletin Board with a stiff brush and lukewarm water using a neutral pH (7-8.5) cleansing agent such as Marmoleum Floor Cleaner; remove water with a squeegee and a cloth. Rinse with clean water to prevent the formation of white residue. Use squeegee once more to remove water.

If further steps are required, contact MDC at 800-621-4006 for additional instructions or assistance.
