ACCESSORIES & TRIM

GridMax™

GridMax™ is a patented, snap-on grid cover designed to make ceiling grid systems invisible. It is cost effective and doesn't rust or scratch. GridMax™ is sized to fit over 15/16" T-bar suspension grid systems. GridMax™ profiles are available for many finishes. Please contact MDC Interior Solutions Customer Service for more details about your specific needs. Mains, tees, and moldings are necessary to cover the entire grid system. They are packaged together to complete 100 square feet of ceiling, and sold separately to use as needed. See our finishes page for GridMax™ colors.

Hold-Down Clip System for Ceilings

We also offer an easy-to-install, hold-down clip system to help support lay-in ceiling tiles. This clip system attaches to the top of any existing grid to hold (low or high profile) lay-in ceiling tiles in place, preventing the tiles from flipping out of place from air leaks and creating a smooth visual.

MDC INTERIOR SOLUTIONS

Dimension Panels Trim

Dimension Panels Trim is available to join and finish Dimension structures. Edge J-Trim, Divider Trim, Inside Corners and Outside Corners are available in 8' lengths and can be easily cut to size. Trim profiles are available for many finishes. Please contact MDC Customer Service for more details about your specific needs.

The Edge J-Trim simply slides onto the cut edge of the panel. Most installations use decorative wood or metal moldings, but if these elements are not used, Dimension Panels Trim will finish the edges nicely.
