

Care & Maintenance

At the time of installation, be diligent to remove all adhesive while wet. If residue is identified after adhesive dries, rewet with clean warm water, wait 5 minutes and then begin removal. If you have a smooth pattern (Ironwood), the use of a natural sponge should suffice. If you have any other pattern, use a nylon bristle brush (such as used for fingernail or food cleaning) to dislodge the adhesive from the texture. Blot away that dislodged residue, rinse the surface with clean water and dry thoroughly to decide if your effort has been fully effective. Repeat if necessary.

Stains should be removed as soon as possible to eliminate any possible reaction between the staining agent and the wallcovering. Apply a small amount of the recommended cleaning solution and scrub using the methods below. No more than two applications should be needed. For deeper textured surfaces using the fine bristle brush and magic eraser may be more effective.

	Cleaner	Microfiber towel	Fine bristle brush	Magic Eraser
Coffee & tea	1	✓	✓	✓
Wines & vinegar	1	✓		
Cooking oils & fats	1,2	✓		
Juices	1	✓		
Ketchup	1,2	✓	✓	✓
Mustard	1,2	✓	✓	
Betadine, iodine	1	✓		✓
Sharpie Marker	3,4	✓	✓	✓
Machine oils & grease	1,2	✓		
Hand sanitizer	1	✓		
Lipstick	2,3	✓	✓	
Hair dye	1	✓		✓

Cleaner:
 (1) Soap & water
 (2) fantastic or 409
 (3) Krud Kutter Graffiti
 (4) Denatured alcohol

Safe to use cleaning agent

- 409 & Fantastic
- Simple Green
- Magic Eraser
- Ammonia
- Soft Scrub
- Krud Kutter

Safe to use disinfectants & sanitizers

- Quaternary ammonia
- Phenolics
- Hypochlorite's (bleach)
- Alcohols
- Peroxides
