HEALTHCARE DESIGN SOLUTIONS

WELLNESS BY DESIGN

Enhancing care through interior finishes that accelerate the healing process while exceeding health and safety requirements

WELLNESS BY DESIGN

MDC understands the importance of creating a healthcare facility that is a healing environment for both patients and staff. Studies prove that spaces using certain interior finishes, colors, materials, and nature inspired imagery, can help and accelerate the process of treating patients.

Interior designers in this field realize the right colors and patterns have the power to deinstitutionalize healthcare facilities and strive to balance their design goals with the unique physical demands of these environments.

Our experienced team of professionals are trained in the unique needs of the healthcare market and draws from the industry's largest selection of wallcovering and design solutions to meet your every need..

PERFORMANCE WALLCOVERING

MDC has assembled a vast array of inspiring Type II wallcoverings that can create a warm, comfortable, healing environment while meeting your needs for long term performance.

Looking for something truly unique? From a simple custom color to a proprietary design, our custom capabilities provide flexibility to create different moods and environments throughout your healthcare facility.

Performance Wallcovering Attributes

Safety

Easy to clean and disinfect. Meets CDC guidelines for disinfection and sterilization in healthcare facilities.

Aesthetics

Available in thousands of colors, textures and design combinations. Healthcare spaces benefit from the healing properties of biophilic design.

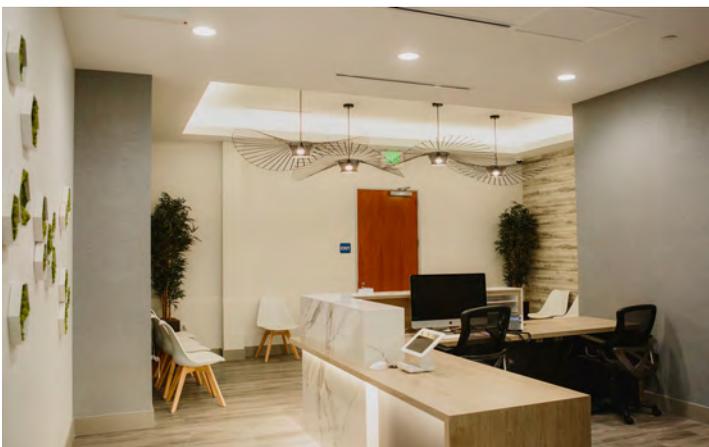

Durability

Engineered to withstand high traffic areas in strength, durability, and integrity of the surface from repeated use of hospital grade disinfectants.

Cost Effective

Decorative and durable at a price point sure to fall within budget - high styled design without sacrifice.

WALLCOVERING vs. PAINT

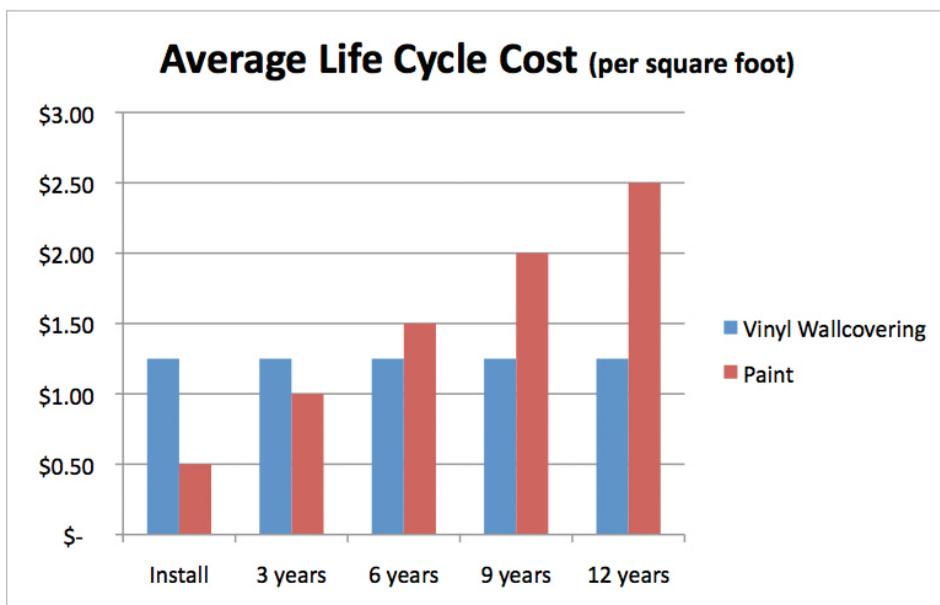

BEYOND BEAUTIFUL.

Performance wallcoverings provide exceptional aesthetics and durability, while incorporating the ideal surface for cleaning and disinfecting in ways a painted surface cannot.

For a surface to be properly disinfected, while meeting CDC guidelines, approved hospital grade disinfectant sprays must be allowed a dwell time to be effective. Performance wallcoverings allow for this dwell time to be achieved without negatively impacting the aesthetics or performance of the wallcovering. Painted surfaces are often porous and will visibly streak.

Over it's lifetime, performance wallcoverings are a more cost effective interior finish:

- Longer life cycle than paint; average of 7-10 years
- Little or no maintenance compared to cost of painting every few years
- Durable, protects the wall from average wear and tear
- Can withstand hospital grade disinfectants without any visual change
- Non-porous construction allows proper dwell time, providing time for disinfectants to be effective

- Paint costs approximately \$0.50 per sq ft for material and install, repainting every 3 years
- Wallcovering costs approximately \$1.25 per sq ft for material and install with an expected life of 7-10 years

WALL PROTECTION

WALL PROTECTION

Duratec flexible wall protection has the aesthetics of a wallcovering and the performance features of rigid panels to ensure walls look beautiful and stay that way.

Duratec is engineered to withstand scuffs, cuts, chemical exposures, and collision impact without showing visible signs of wear and tear. Ideal for use in your highest abuse areas - below handrails where gurney and wheelchair collisions are common.

Duratec Wall Protection Attributes

Durability.

High impact, chemical and stain resistance

Safety

Easy to clean & disinfect with hospital grade cleaners. Meets CDC guidelines for disinfection and sterilization.

Aesthetics

Available in a variety of patterns, textures and colors, as well as digital options, so your space will always look as beautiful as it is strong.

Flexible

Lightweight and flexible, Duratec can be installed on curved surfaces, floor to ceiling walls or railroaded under trim for 60' of seamless wall protection.

Impact Resistant

Provides the aesthetics of decorative wallcoverings with the strength and durability of rigid sheets.

ZINTRA ACOUSTIC

ZINTRA ACOUSTIC

Comfort is an imperative part of the healing process. Too much noise can obviously hinder that effort, resulting in weakened immune systems, slower recover rates, and extended hospital stays. Noise distractions are known to cause annoyance, irritation and fatigue. Reducing noise not only supports patients but also benefits healthcare workers.

Zintra Acoustic Solutions offer a variety of design options that provide exceptional noise reduction without compromising design aesthetics.

Zintra Acoustic Attributes

Noise Reduction

Acoustic NRC ratings of 0.45 - 0.95

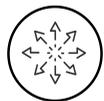

Safety

Disinfect with 10% bleach / 90% water solution in accordance with the recommendations of the CDC

Low VOCs

Indoor Air Quality in a healthcare facility reduces long term and short term illness

Versatile

Wide array of wall, ceiling, and social distancing solutions

Repellency

100% Polyester. Zintra does not absorb any moisture or odors

DIGITAL STUDIO

MERCYONE
Children's Hospital

DIGITAL STUDIO

Designers looking to transform spaces and provide a healing environment for patients need to look no further than MDC for bespoke graphic design solutions.

Our in house design consultants and cutting-edge fabrication enables you to make your design statement without sacrificing health and safety.

Available in a multitude of substrates - MDC Digital Studio can meet your design, performance, and budget needs.

Advantages of Digital Studio

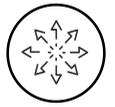

Aesthetics

Unlimited customization with the most comprehensive suite of digital design capabilities

Durability

High impact, chemical and stain resistance with digital FRP

Versatile

Wide variety of substrates to provide options throughout the facility

Safety

Easy to clean and disinfect with hospital grade cleaners

DIMENSION WALLS & CEILINGS

DIMENSION WALLS & CEILING PANELS

Textured, decorative, impact resistant, wall and ceiling panels add visual interest combined with disinfecting and ease of maintenance within your healthcare space.

Dimension Walls panels are available in an endless array of textures and colors. Panels can be applied to flat or curved surfaces, walls, columns, reception desks, and more. Lower-profile textures in solid colors provide maximum durability for high traffic areas.

Dimension Walls Attributes

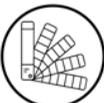

Durability

Impact, chemical, and stain resistant.

Safety

Easy to clean and disinfect with hospital grade cleaners

Aesthetics

Thousands of combinations of finish, color, and texture

Flexible

Lightweight and flexible for ease of shipping, handling, and installation

Impact Resistant

Low profile textures in solid colors can withstand repeated contact by carts, gurneys, and wheelchairs
