

Technical Information and Product Specs

Description:

- Mega Textures are deeply textured thermoplastic sheets in a variety of patterns and colors. These products incorporate the BIO (built in overlap) system to assist in seaming, and they are used in interior design to further beautify spaces.
- Mega Textures is produced from a high impact, fire-rated sheet that is cost competitive with other deeply textured wall products.
- Size - nominally 4' x 8'. This is a dimensional product, so actual thickness varies by pattern. Raw material thickness is 0.045"
